Acute Care Drug Dispensing Limit
Dec. 16 2010

PSHCP benefit card update

The 34-day supply dispensing limit imposed on acute care drugs was changed to 100 days, now the same as the limit applied to all Public Service Health Care Plan (PSHCP) eligible drugs. As in the past, travellers who need more than a three-month supply can make arrangements with the Sun Life PSHCP call center to be authorized to purchase an additional 100-day supply. It will take two business days for this authorization to be relayed to their pharmacist.
